(54) NETTED TUBE FOR FLEXIBLE TUBE OF ENDOSCOPE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a netted tube for flexible tube of endoscope which has a strong bonding force with an outer sheath when integrated into a flexible tube, and can be smoothly curved.

SOLUTION: In a netted pipe 20 for constituting a flexible tube 1 for endoscope formed by covering the periphery of a spiral tube 10 with a plurality of element wire bundles 21 having a plurality of fine wires juxtaposed thereon, and further covering the periphery with a flexible synthetic resin outer sheath 30, when the diameter of the element wire of the netted tube 20 is (dw) in a one having a braid angle of 45°-65°, a braid density of 0.78-0.90, and a braid number of 12, the braid holding number (n) to braid average diameter D of the netted tube 20 is within a prescribed range.

LEGAL STATUS

[Date of request for examination] 10.09.1999

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3231590

[Date of registration] 14.09.2001
